

POPPY SUNCATCHER

Make your own poppy suncatcher for your window!

MATERIALS NEEDED:

- Pencil
- Tape
- Scissors
- Black Cardstock
- Yellow or orange tissue paper
- 1 sheet of self-adhesive contact paper
- 2 poppy templates (2 sizes)

STEPS

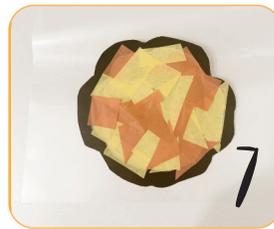

Print out both templates of the poppy flowers and cut them out.

Get the tissue paper and cut it in small squares, rectangles, and triangles.

Trace the bigger poppy on to the cardstock paper.

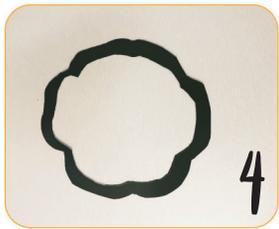

Paste the tissue pieces on the inside of the poppy covering all the exposed contact paper.

Next, trace the smaller poppy on the cardstock sheet inside of the bigger poppy.

Cut the extra contact paper on the outside of the poppy.

Cut along both poppies to end up with only the outline of the poppy.

Your poppy suncatcher is ready!

Peel off the plastic from the contact paper and carefully paste the outline of the poppy on to the sticky side of the contact paper.

Use tape to tape it to the window.
